EOC Daily Emergency Management Report

Date: 4/5/2013
Time: 0940 AM EDT
Report No: 093

Alerts & Warnings

FEMA National Watch Center at a Watch/Steady State level
National Terrorism Advisory System (NTAS) – No Current Alerts
Continuity of Operations (COOP) COGCON Level is 4
EPA HQ at Level 6 (Steady State)
EPA R6 REOC at Level 3 (extended response/single incident) for Mayflower, AR Oil Spill

EPA Headquarters Activities

ASPECT (Airborne Spectral Photometric Environmental Collection Technology) is fully operational and on location in McKinney, TX for the period of April 1, 2013 through April 7, 2013.

Portable High Throughput Integrated Laboratory Identification Systems (PHILIS) labs and assets (located in Edison, NJ and Castle Rock, CO) are operational and available for deployment.

Significant National Weather

A cold front will produce moderate to heavy rain across the Southeast today. Most of the Midwest will be dry except for light snow showers in the Northern Plains and Upper Midwest. Scattered rain and snow showers will continue in northern New England through this afternoon. Moderate to heavy rain and mountain snow are forecast for the Pacific Northwest and northern California. Widespread rain and mountain snow are forecast for the Northern and Central Rockies.

Severe Thunderstorms: There are no organized severe thunderstorms forecast for today.

Tropical Activity: There is no tropical activity threatening U.S. territories.

Tornado Weather: There is a 2 percent chance of tornado activity today in Florida's southern tip.

Significant Flood Outlook: There is significant river flooding at the Souris River in North Dakota today.

Critical Fire Weather: Critical fire weather conditions forecast for parts of New Mexico, Colorado, Kansas, Texas and Oklahoma.

Report of Incident Notifications

Power Plant Bowen Explosion, Cartersville, GA On April 4, 2013, EPA Region 4 dispatched an OSC to respond to an explosion that occurred at Plant Bowen, which is a coal power plant. The explosion occurred in the turbine building of Unit #2. Plant personnel were evacuated, but residents living in close proximity to the plant were not evacuated. The R4 OSC met with the plant's Environmental Affairs group at the scene. It appeared the explosion did not impact tanks containing hazardous materials or transformers. All employees were accounted for, and there were no life-threatening injuries. Upon completion of a site assessment, the OSC demobilized from the scene. The plant was shut down, and the explosion is under investigation.

There were 17 epaos.org websites created and/or updated during this reporting period (4/4/13– 4/5/13).

Exercises / Pre-Deployments

Nothing to report.

Regional Daily Ops Status Report

Reported activities primarily represent NRC notifications with some state-level and other notifications to Regional Phone Duty Officers.

Reported Activities (4/4/13 – 4/5/13)
